

**Product:** rhAmp Reporter Mix, 500 µL

**Product number:** 1076027

**Batch number:** 0000429548

**Expiration date:** 2019-DEC-13

*rhAmp Reporter Mix is optimized for use with rhAmp Genotyping Master Mix and rhAmp SNP Assays. The formulation includes proprietary reporter-dye-labeled oligonucleotide probes for assessing specific allelic discrimination on select instrument platforms that do not require a passive reference.*

Analytical testing		
Test	Specification	Results
Molecular weight by ESI	±2.8 Da of target mass of each oligonucleotide in mix	Pass
Reporter probe concentration by RP-HPLC	±10% of target concentration of each reporter probe in mix	Pass

#### Analytical test methods:

**Molecular weight** (MW) of the individual components of the mix is assessed after formulation and verified by ESI (electrospray ionization).

**Concentration** of each individual oligo within the mix is analyzed by a proprietary RP-HPLC method.

### Functional testing

rhAmp Reporter Mix is tested for allelic discrimination performance using rhAmp Genotyping Master Mix and a rhAmp SNP Assay targeting 1000 copies of double-stranded gBlocks Gene Fragment template. PCR cycling and analysis is performed using the Bio-Rad CFX384 Touch™ Real-Time PCR System.

Test	Result
Allelic discrimination	Pass

Allelic discrimination plot

**Storage:** Store rhAmp Reporter Mix in a sealed container at –20°C, protected from light.
