

Product: rhAmp Reporter Mix, 2500 µL

Product number: 1076029

**Batch number:** 0000474039

Expiration date: 2020-MAR-28

rhAmp Reporter Mix is optimized for use with rhAmp Genotyping Master Mix and rhAmp SNP Assays. The formulation includes proprietary reporter-dye-labeled oligonucleotide probes for assessing specific allelic discrimination on select instrument platforms that do not require a passive reference.

Analytical testing					
Test	Specification	Results			
Molecular weight by ESI	±2.8 Da of target mass of each oligonucleotide in mix	Pass			
Reporter probe	±10% of target concentration of each reporter probe	Pass			
concentration by RP-HPLC	in mix				

## **Analytical test methods:**

Molecular weight (MW) of the individual components of the mix is assessed after formulation and verified by ESI (electrospray ionization).

Concentration of each individual oligo within the mix is analyzed by a proprietary RP-HPLC method.

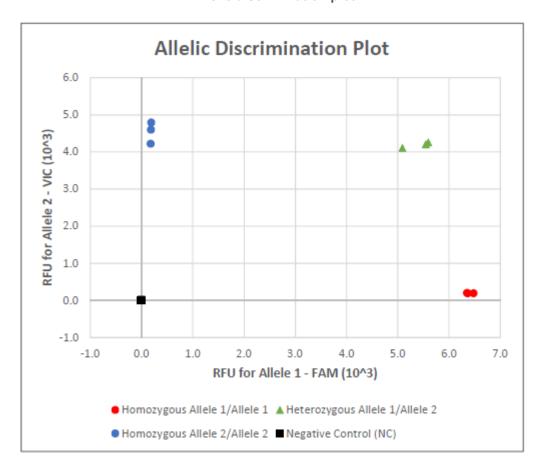

## **Functional testing**

rhAmp Reporter Mix is tested for allelic discrimination performance using rhAmp Genotyping Master Mix and a rhAmp SNP Assay targeting 1000 copies of double-stranded gBlocks Gene Fragment template. PCR cycling and analysis is performed using the Bio-Rad CFX384 Touch™ Real-Time PCR System.

Test			Resi	ult
Allelic d	scrimination		Pas	SS
