

**Product:** rhAmp Reporter Mix, 500 µL

**Product number:** 1076027

**Batch number:** 0000476124

**Expiration date:** 2020-MAR-28

*rhAmp Reporter Mix is optimized for use with rhAmp Genotyping Master Mix and rhAmp SNP Assays. The formulation includes proprietary reporter-dye-labeled oligonucleotide probes for assessing specific allelic discrimination on select instrument platforms that do not require a passive reference.*

| Analytical testing                      |                                                            |         |
|-----------------------------------------|------------------------------------------------------------|---------|
| Test                                    | Specification                                              | Results |
| Molecular weight by ESI                 | ±2.8 Da of target mass of each oligonucleotide in mix      | Pass    |
| Reporter probe concentration by RP-HPLC | ±10% of target concentration of each reporter probe in mix | Pass    |

#### Analytical test methods:

**Molecular weight** (MW) of the individual components of the mix is assessed after formulation and verified by ESI (electrospray ionization).

**Concentration** of each individual oligo within the mix is analyzed by a proprietary RP-HPLC method.

#### Functional testing

*rhAmp Reporter Mix is tested for allelic discrimination performance using rhAmp Genotyping Master Mix and a rhAmp SNP Assay targeting 1000 copies of double-stranded gBlocks Gene Fragment template. PCR cycling and analysis is performed using the Bio-Rad CFX384 Touch™ Real-Time PCR System.*

| Test                   | Result |
|------------------------|--------|
| Allelic discrimination | Pass   |

#### Allelic discrimination plot

**Storage:** Store rhAmp Reporter Mix in a sealed container at –20°C, protected from light.
