

Portals and punchouts

Simplify your e-procurement processes with our custom web portals and punchouts

Portals

Customized IDT websites for core labs and organizations

- Convenient ordering and 24/7 accessibility to our full catalog of products and web tools
- Support for blanket POs and a variety of other payment methods
- Access to institution- or customer-specific funding information, such as grant numbers, for easy management of purchasing and budgets

Punchouts

Enabled through providers such as SciQuest, Ariba, Coupa, and others

- Seamless ordering integration between your existing e-procurement system and the IDT website
- 24/7 accessibility to our full catalog of products and web tools
- Support for multiple protocols, including cXML and OCI

benefits

Streamline purchasing processes with convenient online ordering and an approval system for administrators.

Reduce administrative costs with electronic delivery of purchase orders and invoices.

Control your research budget by managing large orders and tracking information easily.
