

Dear valued customer,

As a major step toward providing a more comprehensive NGS portfolio to advance genomics research, [Integrated DNA Technologies \(IDT\)](#) has acquired [Swift Biosciences](#).

A notification was emailed on Sept. 28, 2021 to inform customers that all IDT and Swift Biosciences next generation sequencing (NGS) products will become part of the IDT xGen™ brand. To see the complete list of products impacted, including list price in USD and CAD, please refer to Appendix A and Appendix B.

Ordering:

Prior to December 2021, orders placed through Swift Biosciences will continue to **list Swift Biosciences as the vendor** for shipping and invoicing. **In December 2021**, orders placed through Swift Biosciences will **shift to list IDT as the vendor** for shipping and invoicing.

As a follow up to this message, another communication will be sent announcing the exact cut over date in December 2021 when these shipping and invoicing changes will occur.

Once the cut over date in December 2021 is announced:

- POs should list IDT as the vendor.
- Orders received as a PO issued to Swift Biosciences will result in a request to the customer to reissue with IDT as the vendor.
- POs received with the legacy Swift part numbers or product names will result in a request to the customer to reissue with IDT as the vendor.
- Order documentation will include IDT formats for order confirmations, packing lists, shipping notifications, and invoices.

IDT offers two convenient ways to order — online and by email through eutechsupport@idtdna.com. Organizations that do not currently have an online account are encouraged to [set one up](#) to access order history and download copies of invoices, Safety Data Sheets (SDS), Certificates of Analysis (COA) and QC documents.

Payment and Remittance:

All orders require a valid form of payment at the time of processing.

Options include:

1. Purchase order (PO)
2. Credit card (Visa, MasterCard, or American Express) for online orders only
3. IDT OligoCard
4. Check
5. Wire transfer

Invoices may be paid online by signing into a web account and selecting **My Account**.

For more information on remittance and wire transfer details, please visit the [frequently asked questions](#) page.
