ORDERING CUSTOM DNA OLIGOS

The screenshot shows the IDT website interface. At the top left is the IDT logo (INTEGRATED DNA TECHNOLOGIES). A search bar is located to the right of the logo. In the top right corner, there are links for 'GET HELP', language options ('EN', 'SI', 'NG'), and a shopping cart icon showing '0 ITEMS ₩0 KRW'. Below the header is a navigation menu with categories: 'PRODUCTS & SERVICES', 'APPLICATIONS & SOLUTIONS', 'SUPPORT & EDUCATION', 'TOOLS', and 'COMPANY'. A blue button labeled 'ORDER MENU' is followed by the text 'You are using the MBIotech- South Korea IDT portal.' The main content area is divided into three columns. The left column features the 'm.biotech messenger of biotechnology' logo and several product categories: 'Synthetic Genes' (gBlocks Gene Fragments and gBlocks HiFi Gene Fragments, eBlocks Gene Fragments, Custom gene synthesis, Megamer Single-Stranded DNA Fragments), 'Next Generation Sequencing' (Library preparation: DNA Library Prep Kits, RNA Library Prep Kits, Methyl-Seq DNA Library Prep Kit, Adapters & Indexing Primers; Hybridization capture: Custom Hyb Panels, Predesigned Hyb Panels, Exome Hyb Panel), 'Gene Expression' (qPCR Probe-Based Assays, qPCR Primer-Based Assays, Predesigned qPCR Assays, Custom qPCR Probes, Affinity Plus qPCR Probes, PrimeTime Gene Expression Master Mix, RNase H2 Enzyme), and 'Genotyping'. The middle column, under 'Custom Synthesis', lists 'Custom DNA oligos' (highlighted with a red box), Custom RNA oligos, oPools Oligo Pools, Ultramer DNA Oligos (up to 200 bases), Large scale synthesis, Inventoried oligos, and GMP Oligos. The right column, 'Your Order Center', includes 'Quick Select' (rhAmp SNP Assays, Predesigned qPCR Assays, Custom Gene Synthesis, gBlocks Gene Fragments), 'Order History (view all)' (a table with one row: Order Nbr Pending, Order Date 3/13/2023, Status Rejected, View N/A), 'Saved Orders (view all)' (No Saved Orders Found), 'Stock Products' (Order by Part Number), and 'Genome Editing' (CRISPR-Cas9 genome editing, CRISPR-Cas12a (Cpf1) genome editing, HDR Donor Oligos, CRISPR Custom Guide RNAs, CRISPR nucleases, Genome Editing Analysis Kit).
